

**FINAL YEAR MEDICAL STUDENTS
PAEDIATRIC TUTORIAL – 22.07.2015**

Batch 22

Tutorial - 13

1. An 8 month old child has a 3 day history of fever, irritability and crying while passing urine.

A diagnosis of febrile urinary tract infection was made.

- a. Mention important information that you would obtain in the history.
 - b. State the physical signs that you would look for.
 - c. Describe the management and follow up of this child.
-
2. a. Briefly outline urinary tract abnormalities.
 - b. List clinical features that would suggest them.
 - c. Outline the investigations available to detect such abnormalities.

Please note that the students who do not come prepared for the tutorial will not be allowed to participate at the tutorial and they will be marked absent.
