

**FINAL YEAR MEDICAL STUDENTS
PAEDIATRIC TUTORIAL – 11.03.2015**

Batch 22

Tutorial - 04

Immunization is one of the most important factors that has reduced childhood morbidity and mortality.

1. Describe the principles behind immunization.
2. Categorize the vaccines available in the National Immunization Programme (NIP) and outside NIP in Sri Lanka, according to the type of vaccine.
3. List the latest schedule of NIP in Sri Lanka.
4. A 16 month old child from an child development center is admitted to the Paediatric ward with acute gastroenteritis. He has had only the BCG vaccine. Prepare a vaccination schedule for this child explaining the principles.

Please note that the students who do not come prepared for the tutorial will not be allowed to participate at the tutorial and they will be marked absent.
