

**FINAL YEAR MEDICAL STUDENTS
PAEDIATRIC TUTORIAL – 27.05.2015**

Batch 22

Tutorial - 09

1. a) List the causes of jaundice within first week of life.

A term baby with a birth weight of 2.9 kg was noted to have jaundice at 36 hours of age.

- b) Describe how you would manage this baby.

2. A 26 day old term baby was found to be icteric at the well baby clinic.

- a) List the differential diagnoses.
 - b) What information in the history, physical examination and investigations would help to arrive at a diagnosis?

Please note that the students who do not come prepared for the tutorial will not be allowed to participate at the tutorial and they will be marked absent.
