

**FINAL YEAR MEDICAL STUDENTS
PAEDIATRIC TUTORIAL – 08.07.2015**

Batch 22

Tutorial - 11

1. List the types of upper respiratory tract infections and their causative organisms.

2. A 10 month old boy has a clinical diagnosis of right upper lobe pneumonia.
 - 2.1 State the clinical features in the history and physical examination of this child that would help you to arrive at the above diagnosis.
 - 2.2 Mention the aetiological agents for pneumonia in children.
 - 2.3 Describe the management of pneumonia in children.
 - 2.4 List the complications of pneumonia in children.

Please note that the students who do not come prepared for the tutorial will not be allowed to participate at the tutorial and they will be marked absent.
